

As a constant user of satellite radio, and a truck driver, I oppose any effort to restrict XM Instant Traffic and Weather. It has provided a useful service to me when I need it, now! The NAB's petition 04-160 is a bad attempt at stifling competition. Why should I have to listen to nonsense mornig radio shows and wait for the updates. Just allow me to tune in when I need it. I oppose petition 04-106
